HOSPITALS AND THE POOR

Lack of Proper Accommodations in the District.

Mr. George S. Wilson Points Out in What Respects Improvement Is Necessary-Will Go to the New York State Conference of Charities. Other Local Matters of Interest.

The District Board of Charities at its meeting held last night authorized George S. Wilson, Secretary of the Board, to attend the meeting of the New York State Conference of Charities, to be held in Albany for three days, beginning December 3. Mr. Wilson will leave next week, spending some time in the cities of Baltimore, Philadelphia, and intervening cities, studying charity problems as they exist. After the meeting of the conference in Albany he will go to Boston, and will visit several New England cities, observing especially the manner of conducting hospital work.

Mr. Wilson explained to a reporter of The Times today that the District, through its Board of Charities, is gradually feeling its way into a practical system of public charities, including hospital care and treatment, care of the insane, as well as of the poor who have to be relieved temporarily or otherwise with food, clothing, coal, and the necessaries of life. Mr. Wilson stated that upon his trip he should pay a good deal of attention to the methods adopted in the different cities relative to the receiving of persons in hospitals. He referred to the fact that it was at this point that the charities of the District seem to be the most lacking.

"We have as yet no public hospital," he said, "patients which the District must said, "patients which the District must take care of being placed in several private or semi-private institutions, and it is left with them to say whether the individual patients shall be taken in or not. If the hospitals have room, and the patients are not afflicted with incurable disease, the hospitals will take them in, but it is a fact that there is no placa where the District authorities can take a sick man or woman and be sure of the patient being received, except at the lit. sick man or woman and be safe of the patient being received, except at the little hospital at the Washington Asylum, which was built for the purpose of affording accommodations for the sick of that institution alone. Hence, the Disthat institution above. Hence, the bar-trict is poorly equipped to take care of the indigent sick which are constantly thrust upon our hands for care."

Mr. Wilson stated that there was an economic side of the question to be con-

sidered. He explained that it takes \$10,-000 or \$20,000 to supply the needs of the poor under the head of what is commonly called relief work, while it takes \$100,000 or \$200,000 to pay for the hospital treatment and the carc of the indigent sick in the District.

hospital," said Mr. Wilson, "and I may say in passing that the Board of Charities are particularly well pleased with the success which has crowned the labors of the Commissioners in securing so good a site at so reasonable a price. Now it is incum-bent upon us to have the best hospital outfit and the best conducted institution in the United States, if Congress will give us the money. To this end my trip to the Northern cities will be one of observation and the collection of information for the guidance of the board upon my return.
Doubtless the construction of the hospital
buildings will be entrusted to a commission who will view buildings elsewhere and learn what are the best appliances in the line of buildings for a modern hospi-tal. But after the buildings are put up it will be necessary to set the hospital runwill be necessary to see the hospital rain-ning, and I may say that the Board of Charities are already at work upon that problem and will continue to work upon it intil it is solved in a practical way.'

about the next steps to be taken in connection with the proposed municipal hos-pital, said that it was the intention of the Commissioners to ask Corgress to add to the balance of the appropriation left from the \$100,600, a sufficien amount to enable them to secure plans for the building or buildings to be erected. In so stitution as the municipal hospital will undoubtedly be Mr. Macfar-land thought that wisdom would dictate a policy of moving slowly in the prelimi-

The Commissioner suggested that Con-gress might authorize the Board to secure the services of a commission of architects and hospital experts to serve the district in determining upon plans for buildings and the general arrangement of the various structures and the grounds so as to make the institution both useful nd beautiful. Mr. Macfarland said that troublesome problem would stare such amission in the face at the beginning of its labors Some claim, he said, that the hospital should be one large building practically under one roof, while others insist that the institution should be composed of several smaller buildings, with a view of separating wards from one an-other and of applying the cottage idea to hospical arrangement. Mr. Macfarland is of the opinion that a year's time is not too much to settle this and numerous other questions that will arise through a special commission, before a sod is turned upon the newly purchased tract of land.
